

Novus 1.6 installation notes EN

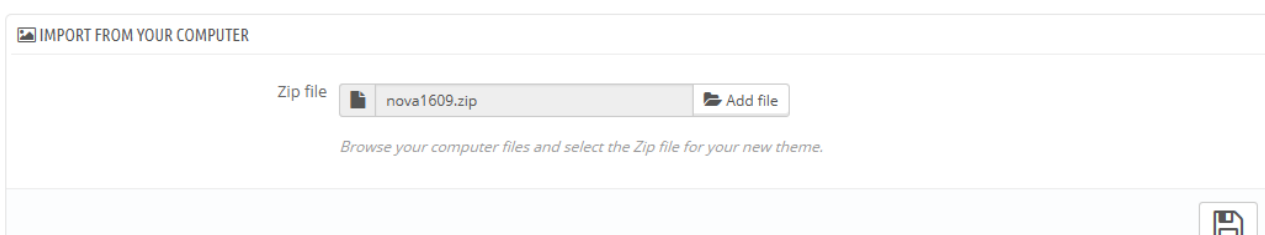

To install this theme you must have a working version of Prestashop already installed. For information in regard to installing the Prestashop platform, please see the [Prestashop User Guide](#)

1. Installation – Import from Preferences > Themes (recommended)

1. Login to your back-office and go to Preferences - Themes.
2. Click on “Add new theme”

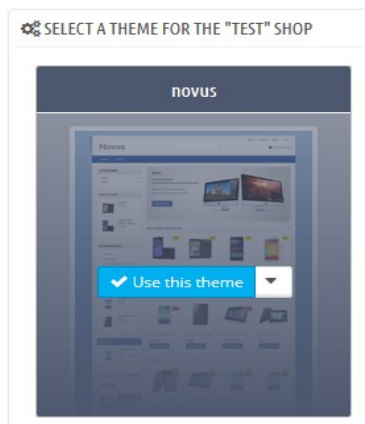

3. Select the zip with theme, click on “Save”

If you receive some error about uploading zip file, try to copy the theme zip manually into your FTP to /themes/ folder and then use “Import from FTP” option.

4. In section “Select a theme”, find novus and click on “Use this theme”

5. Confirm the modules setup

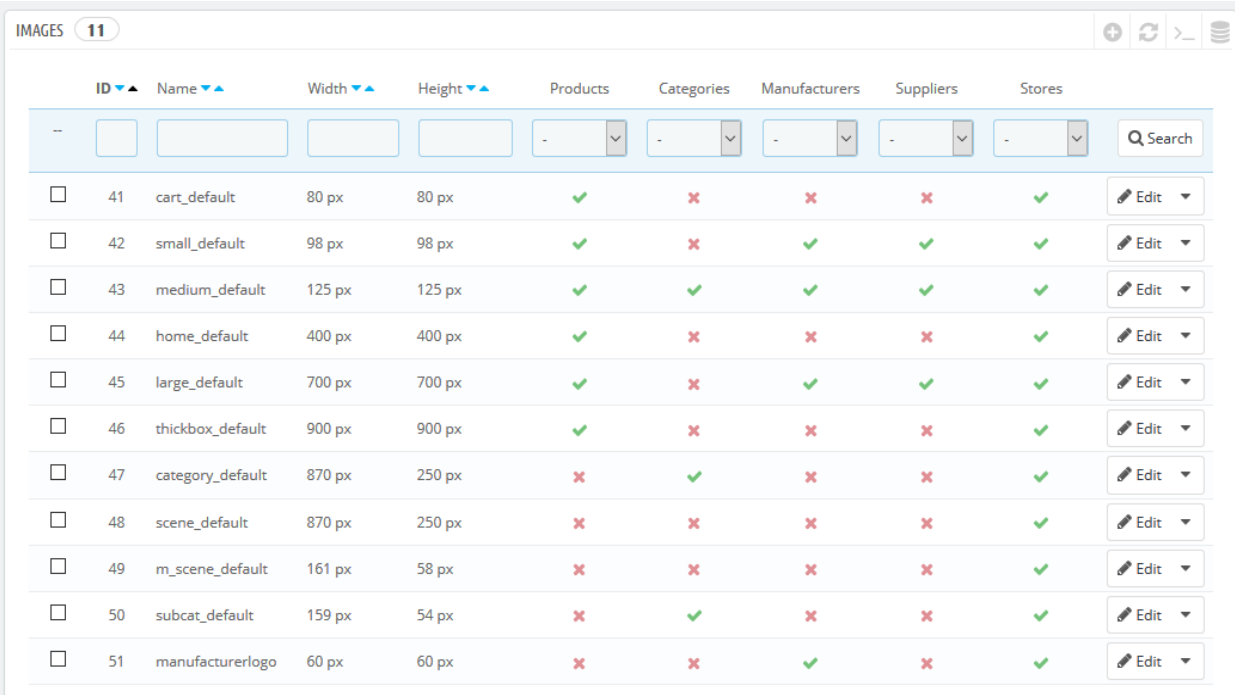

Select the theme's modules you wish to install + Show 8

Select the theme's modules you wish to enable + Show 34

Select the theme's modules you wish to disable + Show 19

Select the modules from the old default-bootstrap theme that you wish to disable + Show 9

6. Go to "Preferences" → Images, and recheck that you have image preferences setup according to the following screenshot:

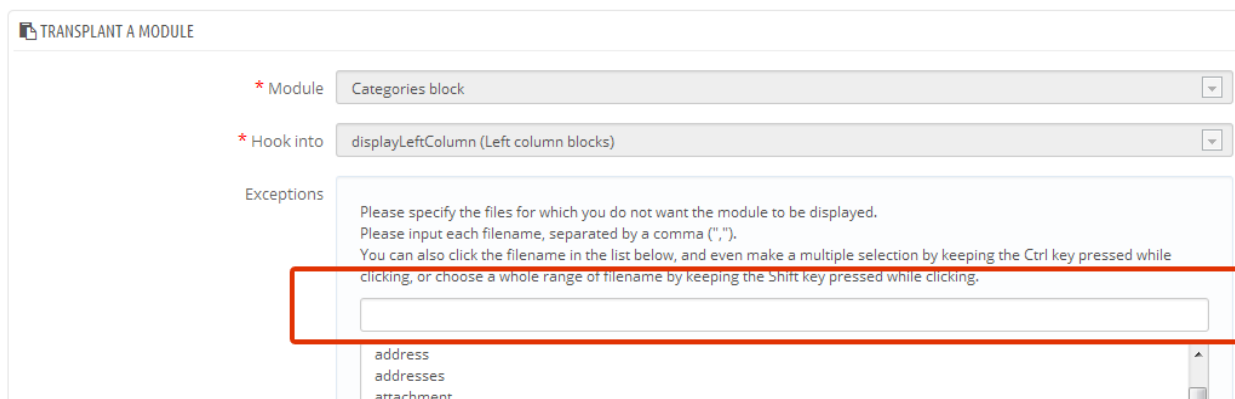

The screenshot shows the 'IMAGES' preferences screen with a table of image settings. The table has columns for ID, Name, Width, Height, Products, Categories, Manufacturers, Suppliers, and Stores. Each row represents a different image type, and the status of each preference is indicated by a green checkmark or a red X. A search bar is located on the right side of the table.

ID	Name	Width	Height	Products	Categories	Manufacturers	Suppliers	Stores	
41	cart_default	80 px	80 px	✓	✗	✗	✗	✓	Edit
42	small_default	98 px	98 px	✓	✗	✓	✓	✓	Edit
43	medium_default	125 px	125 px	✓	✓	✓	✓	✓	Edit
44	home_default	400 px	400 px	✓	✗	✗	✗	✓	Edit
45	large_default	700 px	700 px	✓	✗	✓	✓	✓	Edit
46	thickbox_default	900 px	900 px	✓	✗	✗	✗	✓	Edit
47	category_default	870 px	250 px	✗	✓	✗	✗	✓	Edit
48	scene_default	870 px	250 px	✗	✗	✗	✗	✓	Edit
49	m_scene_default	161 px	58 px	✗	✗	✗	✗	✓	Edit
50	subcat_default	159 px	54 px	✗	✓	✗	✗	✓	Edit
51	manufacturerlogo	60 px	60 px	✗	✗	✓	✗	✓	Edit

On the same screen, click on **Regenerate thumbnails**

7. Go to Modules > Positions. Edit all modules in **displayLeftColumn** and make sure all modules have **empty "Exceptions" field**. If there is any text, delete it:

The screenshot shows the 'TRANSPLANT A MODULE' form. The 'Module' dropdown is set to 'Categories block' and the 'Hook into' dropdown is set to 'displayLeftColumn (Left column blocks)'. The 'Exceptions' field is highlighted with a red box, indicating it should be empty. Below the field, there is a list of filenames: address, addresses, and attachment.

Now the theme is installed and you need to configure it's modules.

2. Configuration of modules

Novus theme is provided with several additional modules that should be configured.

		Front Office Features Novus copyright info and payment logo block v1.0 - by WEB-PLUS Create easily block with any content.	
		Front Office Features Novus Facebook fanbox in sidebar v1.3 - by WEB-PLUS Displays a block for subscribing to your Facebook page.	
		Front Office Features Novus Featured products on the homepage. v0.9 - by WEB-PLUS Displays sliding featured products in the middle of your homepage.	
		Front Office Features Novus homepage image slider v1.2.7 - by WEB-PLUS Adds an image slider to your homepage.	
		Front Office Features Novus image slider in sidebar v1.2.7 - by WEB-PLUS Adds an image slider to your sidebar.	
		Front Office Features Novus Inner Zoom product v1 - by WEB-PLUS Adds zoom on your products images.	
		Front Office Features Novus new products block v0.9 - by WEB-PLUS Displays a block featuring your store's newest products.	
		Front Office Features Novus options panel v1.0 - by web-plus Configure the theme.	
		Front Office Features Novus Sliding manufacturer logos in footer v2.0 - by WEB-PLUS Add block with logos in footer	
		Pricing and Promotion Novus specials block v1.1.1 - by WEB-PLUS Adds a block displaying your current discounted products.	
		Front Office Features Novus theme colors and settings v1.0 - by WEB-PLUS Setup theme colors and settings	

Novus options panel

In first section of this module, you can enable/disable theme related modules or go to their configuration screen to setup them. You can also hide subcategories, switch default view from grid to list or disable Quick View (if you want to hide all “functional buttons” - Quick View, Compare, Wishlist – go to configuration of “Novus theme colors and settings “ module, where is option for that).

Novus manufacturer logos in footer

Go to Back Office > Modules, find „Responsive manufacturer logos in footer“ module and click „Configure“.

The module provides following options:

1. Select size of logo – you can choose the size of manufacturers logos. The default size is “small_default” which already exists in Prestashop and by default is set to 45 x 45px. If you want to use custom size for manufacturers logo, you need to choose “manufacturerlogo” size. Before saving the configuration page with “manufacturerlogo” size, you need to create this new image size in Back Office > Preferences > Image. Click on Add new and setup the configuration as follows. In this example we set the height and width to 60px but you can change this value as required. The name MUST BE manufacturerlogo. After saving this new image size, do not forget to regenerate thumbnails on the same screen.
2. Transition – Indicates which effect to use for the transition
3. Visible items - The number of visible items.
4. Scroll items - The number of items to scroll.
5. Duration - Determines the duration of the transition in milliseconds.
6. Pause - The amount of milliseconds the carousel will pause.
7. Auto start - Determines whether the carousel should scroll automatically or not
8. Random – Carousel will start from random position
9. Circular - Determines whether the carousel should be circular.
10. Infinite - Determines whether the carousel should be infinite.
11. Note: It is possible to create a non-circular, infinite carousel, but it is not possible to create a circular, non-infinite carousel.
12. Mouseover pause - Determines whether the timeout between transitions should be paused

 SETTINGS

Select size of logo

small_default

Choose small_default or manufacturerlogo size. small_default is default image size which already exists in Prestashop. If you want to use custom logo size, create new size in Preferences - Image with name manufacturerlogo and size as required. Then regenerate thumbnails.

Using logo in PNG format (transparent)

With default settings, Prestashop supports logo only in JPEG format. In order to allow PNG logo, go to Preferences → Images and setup as follows:

Then you will be able to upload also PNG logo. You can still use JPEG as well.

Image format ☐ Use JPEG.
☒ Use PNG only if the base image is in PNG format.
☐ Use PNG for all images.

Photoshop template for creating slides and category images

PSD files are stored in zip archive in PSD folder.
